 excellent

Positioning– the ability to explain the chosen and developed position in the debate concerning the issues dealt with in the graduation project. Being able to conduct a productive professional conversation/debate.

insufficient
 poor
 sufficient
 good
 excellent

Explanation:

Please include with this form:

- the project book documenting the graduation project. This should have been handed in before the Examination;
- in the case of excellence in all areas and if the graduation project is considered to be extraordinary and groundbreaking, the committee of examiners may hand in a request to grant the predicate "Cum Laude" at the graduation. A unanimous vote of the committee is required for this. The request must be submitted to the Board of Studies by means of the "Cum Laude form". The student will *not* be informed of this particular consideration at this point.

The graduation mentor should hand in two weeks after the examination:

- a personal, written report in which the relevance of the work, its most striking aspects and the graduation process are described. The personal report is read and made available to the public during the public presentation.
